Art Unit: 2812

Reasons For Allowance

The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The basis for the allowability is :

Prior art of record does not teach a thin-film resistor used for a circuit adjustment, connecting an ammeter to an output terminal of photoelectric transfer element, irradiating reference light having a predetermined intensity on photoelectric transfer element, storing a current value detected by ammeter when photoelectric transfer element is irradiated by said reference light, replacing ammeter with a current generating source, supplying current from current generating source to signal processing circuit by an amount identical with the stored current value under a condition no light is irradiated on the photoelectric transfer element, performing a laser trimming on the thin-film resistor to generate a desired output from the signal processing circuit as a result of the circuit adjustment with a laser oscillator.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
